

Church Call System Updated

Since 2006 we have been using a system called Phone Tree to share messages with the church. Over the past months it has become more and more erratic in its functionality. We have transitioned to a new system

from a site called DialMyCalls that will allow us more flexibility and room for growth. Better yet, it will only cost us \$3 more per month than what we were having to pay to use the Phone Tree system.

In addition to being able to send calls to all the church, or just groups within the church, we will also be able to initiate the calls from a land line, a cell phone, or any computer attached to the internet. Also, we will have the ability for the Chairperson of each ministry group or team to initiate calls just to the members of his or her team without having to go through the office to make the call. We will also have the ability to send texts alerting you to upcoming events, activities, and changes of schedule. We will also be able to send emails. You will be able to go online and listen to a recording of a call in case you missed it. I hope that you can begin to see the added flexibility that we now have at our disposal.

We are limited in the number of persons that we can have in the system. So our goal will be one phone number per household. If you want to use your cell phone to receive the calls then you need to let us know. Most of the numbers we have in our system are for home phones. If you want to receive text messages, you **MUST** use your cell phone. To **OPT IN** to the text system, simply text TRINITYUMCTEXT to 80123 and you will be automatically added to our text system.

It may take us a few weeks to get everything up and running smoothly, but we will get there. Please be patient with us.
